

Ore: The Mining Game Errata V1

1. Drill Bits - The Board should have a \$3 mark on it. The Rules are correct in that you get \$3 when using the Drill Bit location with a worker. Please note that you do not get \$3 if a building gives you a drill bit.
2. In the rules it says to replace contracts instantly, and the Quick Sheet says to do it at the end of the turn. It should be done instantly.
3. Mine Cage – The 2nd upgrade should be 3 points not 2.
4. Coal mine with different color level 3 cage. This is a Level 2 cage. The Color is Correct, not the

number.

5. Permit office on the board tells you to draw 5 and keep the space you pay for. Game rules tell you to draw up to 3. *** The Rules are correct, up to 3 cards.
6. White workers for private mines are grey.
7. The picture of the game board in the rules is different from the actual board. ** This is what led to many of the issues I am sorry for that mistake.
